OCII Commissioners Jaimie Cruz,

During a housing and homeless crisis, City Hall has allowed Lennar Five Point to change the timeline and break promises 3 times since 2008 for jobs, housing, parks, new roads and community benefits that were due by now on 272 acres of public land at Candlestick.

Now, the developer is asking for city approvals for further delay (30 years or more) and double the previously approved public funding (\$6 billion) with out any clear and accountable commitments for delivery of the promised housing, parks, and jobs.

I join in urging you require Lennar Five Point to commit to the following before any new approvals:

- 1) Finish their 2018/19 promises for parks, affordable housing, and roads at Candlestick;
- 2) Invest in the promised benefits, training and local hire for the current and displaced community for all types of living wage jobs; and
- 3) Complete a real community process to decide if and how the newly proposed office towers development will fully benefit the Bayview, Candlestick and Hunters Point communities.

Thank you for your support.

OCII Commissioners Jaimie Cruz,

In 2008, Lennar FivePoint promised to build over 7,000 housing units of desperately-needed housing on public land at Candlestick Point by 2022. As of today, they've only built 337 units, changed the timeline and broken promises to develop 3 times since 2008.

Now, the Developer is pushing City Hall to approve a new agreement to double the funding (to \$6 billion) and timeline (30 years) with no accountability to deliver the promised living wage jobs, affordable housing, parks or other promised benefits.

I join in urging you to require Lennar FivePoint to commit to the following before any new approvals:

- 1) Finish their promises for parks, affordable housing, and roads at Alice Griffith and South Candlestick due NOW;
- 2) Invest in the promised benefits, training and local hire for the current and displaced community; and
- 3) Complete a real community process to decide if and how more than doubling the office space benefits and doesn't displace more of the Bayview, Candlestick and Hunters Point communities.

Thank you for your support.

RE: Candlestick Development

As a long-time resident of Bayview Hunters Point, I strongly support the Candlestick Point project. This development promises significant benefits for our neighborhood and San Francisco as a whole.

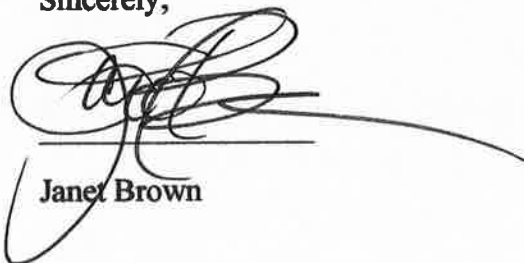

I recently attended a community workshop hosted by FivePoint and learned about their updated project plans for Candlestick. Responding to changes in the retail landscape, and concerns from the community, the project now aims to attract more research and development businesses while still providing the housing and other amenities that the community and its residents are currently living without.

During the workshop, it was mentioned that there will be over 3000 jobs in this next phase of development, and nearly 700 homes. District 10 desperately needs more housing options, and there is always a need for more employment. We also need the parks and opportunities for new business that are being promised as well.

I and other residents are happy that the project is finally restarting. We have been living with the empty space while other projects in the city move forward. My fear is not that a few residents who are in opposition will have a greater say-so than the majority of the community who want the benefits the project will bring. It would be terrible if Candlestick will not someday turn into the homes and businesses for D10 residents.

I implore you and other City departments treat this project with the same urgency as other projects and move it forward. This project can add to our neighborhood, stimulate economic growth, and enhance residents' quality of life. However, timely action is essential to prevent further delays and ensure we seize his vital opportunity for the Bayview.

Sincerely,

Janet Brown

I work at the Brett Harte campus and this vacant site is becoming a blight, there's increased trash dumped in front of school over summer and dangerous brush fires near where people love, go to school, and work. This is unfair to all of us!

We demand affordable housing for Bayview locals and workers!

I join in urging you to require Lennar FivePoint to commit to the following before any new approvals:

OCII Commissioners Jaimie Cruz,

During a housing and homeless crisis, City Hall has allowed Lennar Five Point to change the timeline and break promises 3 times since 2008 for jobs, housing, parks, new roads and community benefits that were due by now on 272 acres of public land at Candlestick.

Now, the developer is asking for city approvals for further delay (30 years or more) and double the previously approved public funding (\$6 billion) with out any clear and accountable commitments for delivery of the promised housing, parks, and jobs.

I join in urging you require Lennar Five Point to commit to the following before any new approvals:

- 1) Finish their 2018/19 promises for parks, affordable housing, and roads at Candlestick;
- 2) Invest in the promised benefits, training and local hire for the current and displaced community for all types of living wage jobs; and
- 3) Complete a real community process to decide if and how the newly proposed office towers development will fully benefit the Bayview, Candlestick and Hunters Point communities.

Thank you for your support.

OCII Commissioners Jaimie Cruz,

In 2008, Lennar FivePoint promised to build over 7,000 housing units of desperately-needed housing on public land at Candlestick Point by 2022. As of today, they've only built 337 units, changed the timeline and broken promises to develop 3 times since 2008.

Now, the Developer is pushing City Hall to approve a new agreement to double the funding (to \$6 billion) and timeline (30 years) with no accountability to deliver the promised living wage jobs, affordable housing, parks or other promised benefits.

I join in urging you to require Lennar FivePoint to commit to the following before any new approvals:

- 1) Finish their promises for parks, affordable housing, and roads at Alice Griffith and South Candlestick due NOW;
- 2) Invest in the promised benefits, training and local hire for the current and displaced community; and
- 3) Complete a real community process to decide if and how more than doubling the office space benefits and doesn't displace more of the Bayview, Candlestick and Hunters Point communities.

Thank you for your support.

San Francisco, CA 94103

Dear Director Kaslofsky and OCII Commissioners,

I am writing on behalf of the International Union of Elevator Constructors Local No. 8 to express our strong support for the proposed rebalancing amendments for the Candlestick Point project. As an organization deeply committed to the economic vitality of San Francisco and the well-being of our workforce, we recognize the critical importance of this project to our city's economic recovery and to the creation of urgently needed housing.

The Candlestick Point project, with its existing project labor agreement, is a key opportunity to provide much-needed jobs for our members and to stimulate the local economy. The prompt approval of these amendments is essential to kickstart activity, allowing permitting processes to advance and critical infrastructure work to begin. This will not only create immediate employment opportunities for skilled craftspeople but also lay the groundwork for the development of housing that our community desperately needs. Every single job created with this important work is connected to paid apprenticeship opportunities for future workers. This career pipeline has been decimated by the pandemic and other economic factors and sadly, the workers and residents of District 10 are all too often the last to benefit. Moving this project will put local and hyperlocal contractors to work and in doing so put community to work on rebuilding their neighborhoods. This is a win-win-win for San Francisco's blue-collar workforce and future tradespeople.

We respectfully urge the OCII to prioritize the approval of these amendments to ensure that the project moves forward without delay. Your timely action will support both our workforce and the broader economic recovery of San Francisco.

Thank you for your attention to this important matter.

Sincerely,

Matt Russo  
Business Manager

# BAY AREA NEW LIBERALS

August 25, 2024

To the Members of the OCII Commission,

The Bay Area New Liberals are writing to express our strong support for the Candlestick Point and Hunters Point project, including the most recent amendments.

As has been noted by many others, we are in the middle of a severe housing shortage caused by decades of underbuilding and onerous process requirements that has made the cost of living in San Francisco unacceptably high for poor and even middle-income residents. As such we are inclined to support the swift and expedient approval of any housing project which would add units to the city's housing stock. We believe the proposed project is sound and worthwhile which are crucial in addressing the city's housing shortage.

We especially appreciate the integration of residential, commercial, and recreational spaces. Far too often, homes are built too far away from amenities, forcing residents to take unnecessary car journeys to fulfill their needs.

The Candlestick Point project, with the proposed amendments, represents a small, but nonetheless worthwhile step towards reducing housing costs in the San Francisco Bay Area. We urge the OCII to approve the amendments and allow this vital project to move forward.

We thank you for your consideration. We and our membership are looking forward to the hearing on September 3, 2024, and will be there in support of the project.

Sincerely,  
Kevin Gray

August 22, 2024

Dear Director Kaslofsky and Members of the OCII Commission,

The Housing Action Coalition (HAC) is writing to express our strong support for the proposed amendments to the Candlestick Point project. **These amendments align with HAC's mission to promote and advocate for the development of affordable, high-density housing in San Francisco.** HAC's Project Review Committee was proud to endorse the project as it exceeds our high standards in addressing the regional housing shortage, affordability, and displacement crisis.

We believe the proposed changes will enhance the overall viability of the project, leading to the creation of much-needed housing, including a significant number of affordable units, which are crucial in addressing the city's housing shortage. The project's thoughtful integration of residential, commercial, and open spaces will contribute to a vibrant, inclusive community that meets the diverse needs of current and future residents.

Specifically, in terms of affordability, we were impressed by the large number of homes this project will provide, totalling 7,218 new homes. This project will help meet the state-mandated goal of 82,000 new homes with an astounding **32% being dedicated to affordable housing**. The project also includes a completed Alice Griffith public housing complex that brings 337 100% affordable homes to the area.

In terms of community benefits, we were pleased with the project team's emphasis on vibrant design to bring parks, open spaces, and other community-serving destinations to the area. Utilizing a street network system, the project's walkability and multimodal environment will help to ensure safety and convenience, with a diverse set of transportation options. In total, the project will provide 105 acres of new and improved public parks and open space, with a modernized and green Willie Mays Park.

Additionally, we were excited to learn that the project has already contributed over \$136 million towards community contributions and successes, including a Business Incubator Space Program, affordable housing, an education and scholarship fund, and workforce and job training. The project will create over 4000 construction jobs and 8000 permanent jobs across the entire new area which include offices, retail, restaurants, hotels, and many more.

HAC has long championed developments that prioritize sustainability, affordability, and smart urban growth. The Candlestick Point project, with the proposed amendments, represents a critical opportunity to advance these goals. **We urge the OCII to approve the amendments and allow this vital project to move forward.** Thank you for your consideration. We look forward to a robust hearing on September 3, 2024, and will be there to support efforts for approval.

Sincerely,

**Corey Smith**, *Executive Director*

RE: Candlestick Development

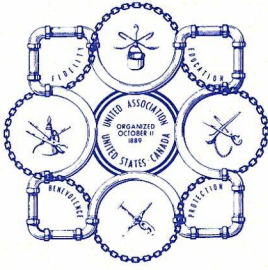

As a long-time advocate of Bayview Hunters Point, I strongly support the Candlestick Point project. This development promises significant benefits for our neighborhood and San Francisco as a whole.

I recently attended a community workshop hosted by FivePoint and learned about their updated project plans for Candlestick. Responding to changes in the retail landscape, and concerns from the community, the project now aims to attract more research and development businesses while still providing the housing and other amenities that the community and its residents are currently living without.

During the workshop, it was mentioned that there will be over 3000 jobs in this next phase of development, and nearly 700 homes. District 10 desperately needs more housing options, and there is always a need for more employment. We also need the parks and opportunities for new business that are being promised as well.

I am extremely happy that the project is finally restarting. The community has been living with the empty space while other projects in the city move forward. My fear is that a few residents who are in opposition will have a greater say-so than the majority of the community who want the benefits the project will bring. It would be terrible if Candlestick will not someday turn into the homes and businesses for D10 residents.

I implore you and other City departments to treat this project with the same urgency as other projects and move it forward. This project can add to our neighborhood, stimulate economic growth, and enhance residents' quality of life. However, timely action is essential to prevent further delays and ensure we seize his vital opportunity for the Bayview.

OCII Commissioners Jaimie Cruz,

Parking is a huge issue on Jamestown ave.

Open up a parking garage for the apartment residents that are pouring into the street parking.

The 900 block of Jamestown doesn't have garages are rely only on street parking. We were promised that the apartments would have a back flow of parking yet it does not. The extra garage was turned into a multi purpose room. We are tired of broken promises.

In 2008, Lennar FivePoint promised to build over 7,000 housing units of desperately-needed housing on public land at Candlestick Point by 2022. As of today, they've only built 337 units, changed the timeline and broken promises to develop 3 times since 2008.

Now, the Developer is pushing City Hall to approve a new agreement to double the funding (to \$6 billion) and timeline (30 years) with no accountability to deliver the promised living wage jobs, affordable housing, parks or other promised benefits.

I join in urging you to require Lennar FivePoint to commit to the following before any new approvals:

- 1) Finish their promises for parks, affordable housing, and roads at Alice Griffith and South Candlestick due NOW;

San Francisco, CA 94103

*8/26/2024*

**RE: Support for Five Point's Candlestick project**

Dear Commission on Community Investment and Infrastructure:

SF YIMBY is pleased to support the proposed Candlestick project from Five Point. This project would provide thousands of new homes for current and future San Franciscans, with 7,218 proposed homes included in this. This project will help meet the state-mandated goal of 82,000 new homes by 2031 and would especially help with our affordable requirements, with 32% being dedicated to that.

This project would also bring a number of other amenities to Candlestick Point, adding new parks, green space, and other community benefits, with 105 acres of planned parks and open space. These are just a few of the benefits, along with numerous investments in the local community that this large-scale project will bring to the neighborhood.

SF YIMBY is a party of YIMBY Action, a network of pro-housing activists fighting for more inclusive housing policies. Our vision is an integrated society where every person has access to a safe, affordable home near jobs, services, and opportunity.

San Francisco's severe housing shortage is causing skyrocketing homelessness and poverty, crippling our economy, and leading to debilitating commutes that exacerbate our global climate crisis. These impacts fall disproportionately on our city's low-income workers and families, and disproportionately deny communities of color access to opportunity. If we strive to be a society that advances racial and class justice, we must do more to ensure abundant housing in our region. This project will help address the housing shortage and ensure a welcoming San Francisco where everyone can thrive.

Best regards,

Jane Natoli,  
San Francisco Organizing Director

June 20, 2024

To Whom it May Concern,

The Housing Action Coalition (HAC) is pleased to endorse Five Point's Candlestick project. After a detailed presentation, HAC's Project Review Committee has determined this project exceeds our high standards in addressing the regional housing shortage, affordability, and displacement crisis.

Our committee was impressed by the large number of homes this project will provide, totalling 7,218 new homes. This project will help meet the state-mandated goal of 82,000 new homes with an astounding **32% being dedicated to affordable housing**. The project also includes a completed Alice Griffith public housing complex that brings 337 100% affordable homes to the area.

The committee was pleased with the project team's emphasis on vibrant design to bring parks, open spaces, and other community-serving destinations to the area. Utilizing a street network system, the project's walkability and multimodal environment will help to ensure safety and convenience, with a diverse set of transportation options. In total, the project will provide 105 acres of new and improved public parks and open space, with a modernized and green Willie Mays Park.

The committee was excited to learn that the project has already contributed over \$136 million towards community contributions and successes, including a Business Incubator Space Program, affordable housing, an education and scholarship fund, and workforce and job training. In addition, the project will create over 4000 construction jobs and 8000 permanent jobs across the entire new area which include offices, retail, restaurants, hotels, and many more.

The committee praises the project for its exceptional commitment to environmentally conscious design principles. The project is set to attain LEED Gold rating for Neighborhood Development in accordance with the City's Green Building Ordinance. Moreover, it plans to plant up to 10,000 new trees across public spaces and surrounding acres. Additionally, there will be a 51% reduction in potable water demand achieved through reclaimed water, surpassing Title 24 energy standards for the new buildings by 15%.

Overall, the committee is pleased to support the Candlestick project. With its commitment to creating more dense and affordable homes, great design and open space, and environmental sustainability, Candlestick is an exceptional example of a large-scale project that addresses our state's housing crisis by bringing thousands of new homes for all.

Sincerely,

**Corey Smith**, *Executive Director*

OCII Commissioners Jaimie Cruz,

In 2008, Lennar FivePoint promised to build over 7,000 housing units of desperately-needed housing on public land at Candlestick Point by 2022. As of today, they've only built 337 units, changed the timeline and broken promises to develop 3 times since 2008.

Now, the Developer is pushing City Hall to approve a new agreement to double the funding (to \$6 billion) and timeline (30 years) with no accountability to deliver the promised living wage jobs, affordable housing, parks or other promised benefits.

I join in urging you to require Lennar FivePoint to commit to the following before any new approvals:

- 1) Finish their promises for parks, affordable housing, and roads at Alice Griffith and South Candlestick due NOW;
- 2) Invest in the promised benefits, training and local hire for the current and displaced community; and
- 3) Complete a real community process to decide if and how more than doubling the office space benefits and doesn't displace more of the Bayview, Candlestick and Hunters Point communities.

Thank you for your support.
