

Office of Community Investment and Infrastructure (OCII) Transbay Neighborhood (Transbay Project Area)

OCII continues to lead public-private partnerships with the City, Transbay Joint Powers Authority (TJPA), State and developers—including nonprofit affordable housing developers—to transform the City's Transbay project area. A walkable, high-density neighborhood, Transbay will feature the Transbay Transit Center surrounded by residences, offices, retail and parks. It is helping to meet the City's housing demand, and *the affordable development in Transbay is vital to reaching Mayor Lee's goal to provide 10,000 affordable housing units by 2020.*

OCII Catalyzing Public and Private Investment in the Transbay Neighborhood

- Approximately 4,150 housing units, 35% of which will be affordable units
- 2.6 million sf of office development and 200,000 sf of retail space
- 9.2 acres of parks, including: 5.4-acre City Park, 1.3-acre Transbay Park, and a 2.5-acre under-ramp park featuring recreational uses
- Folsom Street redesigned as the neighborhood's main corridor with pedestrian amenities
- Transportation improvements, including a new transit hub, bicycle lanes, widened sidewalks and pedestrian-oriented alleyways

Project Hub—Transbay Transit Center

- OCII is providing crucial funding for the Transbay Transit Center through tax increment revenue and proceeds from the sale of former State-owned properties.
- "Grand Central of the West" regional transit hub connecting eight Bay Area counties through 11 transit systems and serving as the Downtown terminus for Caltrain and future high speed rail.
- The 5.4-acre, 1,400'-long elevated linear City Park doubles as the Transit Center's green roof.

Jobs Creation

- 25,000 construction jobs and 2,700 permanent jobs created through Redevelopment Plan and Transit Center District Plan
